Problem The CEOS development group will be installing the IMS Web Gateway on the machine "ceoseng". In order to perform this installation, a user account called "wwwuser" is required in order to run the required HTTPD. Currently there is no such user account on the machine "ceoseng". In addition to the creation of a "wwwuser" user account, a home directory also needs to be created for an existing user "imswww".			
Proposed Solution Create user account "wwwuser" on machine "ceoseng". Create a home directory for existing user account "imswww".
